

CASPR

Continuous Air & Surface Pathogen Reduction

**EVERY SURFACE,
EVERY SECOND,
EVERYWHERE.**

**Protection the moment
they enter your facility.**

The Evolution of Environmental Disinfection.

Healthcare Proven Technology for all.

CASPR Group has launched new, industrial-grade products. Like the Healthcare solutions, these devices are easily installed, require no operator or chemicals, run continuously, and require maintenance once a year.

CASPR Pro products are 99.96% effective against bacteria, viruses, molds, and even reduce VOCs and odors.

CASPR PRO

HOW IT WORKS

CASPR's Natural Catalytic Conversion utilizes a multi-wavelength ultraviolet light to illuminate a target surface. The target surface is a honeycomb matrix treated with a proprietary photocatalytic coating. Together, the technology converts H_2O and O_2 in the air into safe but effective levels of Hydroxyl Radicals (OH^-), Oxygen ions (O_2^-) and Hydrogen Peroxide (H_2O_2). The CASPR technology produces no ozone.

CASPR In-Duct solutions are easily installed into your existing HVAC ducts. There, these devices run continuously without an operator. They work with your ambient air to generate negatively-charged molecules, like hydrogen peroxide. These molecules exit your duct, circulate the room through the air and land on all surfaces. During this process, these negatively-charged molecules are actively seeking out positively-charged molecules, like mold, bacteria, and viruses, to neutralize by killing at the molecular level. Once neutralized, they revert back to hydrogen and oxygen.

IN-DUCT

- Safe to use in occupied spaces
- Works on all surfaces and floors
- Affordable for facility-wide use

MOBILE

CASPR Mobile is our plug and play solution. Once you plug into your wall and turn it on, it is ready for continuous, 24/7 use. The device comes in one size but has adjustable settings to cover as few as 250 square feet and up to 1,500 square feet. A remote control is included to allow for easy adjustments to your unit.

Custom Solutions

Our team will work with you to create a custom solution to suit the needs of your organization. From casinos to public buildings and from schools to assisted living facilities, CASPR brings safe, proven, Continuous Air and Surface Disinfection.

CASPR'S Natural Catalytic Converter™

Ultraviolet Light

Hydrogen Mist

		Ultraviolet Light	Hydrogen Mist
Proven effective against a broad spectrum of clinically relevant pathogens	Yes	Yes	Yes
Continuous pathogen reduction	Yes	No	No
Safe to use in occupied spaces	Yes	No	No
No disruption or delayed access to areas	Yes	No	No
Continuously eliminates odors	Yes	No	No
No operator required (true "No-Touch")	Yes	No	No
No sensitive use parameters	Yes	No	No
